## About ACME

Acme Softech Pvt. Ltd is an ISO 9001-2000 certified company having more than 10 years of experience in software development and enterprise resource planning with end-to-end expertise in I.T projects and services in 4 countries.

Our range of services starts from basic software development to high end development of ERP modules for any size of company. We are a team of more than 50 professionals working coherently from Noida office with the head of the team having expertise in IT domain for the past 16 years.

Acme's focus has always been to use qualitative and innovative technologies for better technological adoptions by our users. We work on best platform available with open choice of the back end database.

“ generating big ideas, exploring new concepts creating innovative solutions to problems, it's a part of ACME nature. ”

## K2- An ERP for Sugar Mills

K2 is an ERP solution from Acme Softech, especially designed for sugar industry. K2 covers all modules involving processes of sugar industry in a most secured and integrated manner. K2 is designed to cater to the large number of users working in a single or multiple locations at a given point of time.

## K2 Modules

**OraCane** is designed as a self-contained and well-defined module for supporting the complete functionality of Cane Management in a Sugar Mill. OraCane has distinct features like reliability, fast performance, large throughput in less time, high level of automation and farmers' interface.

In the Indian context, OraCane helps sugar mills in processes like survey, bonding, calendaring, indenting, weighment, payment processing, and reports etc. On the other hand, where sugar mills are having their own farming, the process covers land preparation, plantation, irrigation, harvesting, transport, weighbridge management, irrigation material management, vehicle management & wage related issues.

One innovative feature is "Man-Less Weighment" process using magnetic card technology, thereby eliminating the dependency on human resource. This innovative product is the brain child of the head of the company Sy. Ali Raza.

## OraMMS

OraMMS automates the complete life cycle of material management and provides full support in each step of the process. It helps the sugar mill in requirement analysis, budgeting, indenting, quotation, purchase order, valuation, consumption booking, emailing and SMS update etc. OraMMS has excellent security features like: log records, validation at all levels, read only data for defined users etc. which provides a systematic and disciplined approach reducing theft and frauds.

## OraPay

OraPay is an automated payroll module, efficiently managing over all employee records, like; allowances, deductions, leave, grades, scale, rest & holidays, retaining, overtime etc. OraPay has a distinct sub module "electronic attendance" through card reader, which marks the attendance records of an employee. The reports are highly customizable which can be taken on various parameters, thereby giving 360° view of employees work timings.

## OraFA

OraFA automates the financial accounting process in a sugar mill which is interlinked with every department and plays an important role. It works like a hub of K2 ERP. OraFA helps in providing all features of an accounting package and is highly customized for sugar mill environment. The features of OraFA include transaction analysis & cost analysis, funds flow statements, profit & loss, various form of trial balance and balance sheet, composite voucher entries etc. All modules of the ERP generates their own accounting vouchers and this modules club all these transaction and show compiled results.

## OraSales

OraSales is an automated sales management module capturing all sales activities of a sugar mill. It maintains all the records like, sales books, customer details, products & sub products details, taxes, invoices, bills receivable-payable, purchase etc. Like other modules, OraSales update its financial implication to the accounting modules automatically.

## LabTech

LabTech is a module specially designed to cover the lab activities right from the periodical samples entry to daily, monthly and annual reports. Once the data is ready for the day, it automatically compiles the report which can be sent to the concern through e-mail.

## BMS

The purpose of the Budget Management System is meant for operations planning and budgeting. BMS records and reports all cost activities planned for field operations, equipment operations and factory operations. The module covers planning & budgeting for sugar mill departments as well as sections for the budgetary period as per the management requirements. Once the planning is done, the ERP take cares of the budget control automatically and stops transaction, beyond the user's limit.

## MIS

This module is a center point for all modules of ERP which gathers all relevant information on pull basis and provide complete MIS of the company. The module provides a system to view multiple level of summarized data. It drills down from the top MIS to the basic level transaction.

## K2 Features

The ERP is well designed to manage end-to-end operations in a sugar mill like:

- Socket based ERP development technique
- Master data sharing
- Parameters based processing
- Customized Modules
- Auto Voucher Posting
- Multi layer security
- Data encryption
- Cross user data usage

## Our Clients
